# Driver Installation - IDP SOLID Printers for Windows

Rodel

11 months ago · Updated

Follow

1. Connect Power Cable. DO NOT flip the Power Switch On
2. Install a compatible ribbon into the cartridge and insert the cartridge into the printer. [See the video for reference.](#)
3. Connect the USB Cable to the printer and computer. DO NOT flip the power switch on!
4. Go to this [Link](#) and download the driver for Windows.
5. Once the driver download is complete, locate the downloaded file on your computer and fully unzip and extract all the files.
6. After extracting the files, you should see a folder containing the driver files.
7. Within the extracted files, locate the "DDInstall" program and run it.
8. Follow the onscreen prompts during the installation process.
9. Once the Progress Bar reaches the right end in Step 3, click on "CLOSE."
10. Reboot your computer to finalize the installation.

Hi. Need help?
